About us

- Goodearth Agriventures is **headquartered in Singapore** but deeply committed to Africa's spice industry. We manage the entire value chain from farm to fork, with farm-gate procurement through 7 aggregators and 12 farmer's market supporting almost 350+ farmers and their families.
- Our Ikorodu processing plant ensures strict food safety and traceability throughout the supply chain. Beyond products, our mission enriches farmers' lives and communities while serving customers sustainably.
- Our **Mission** is to deliver high-quality, locally-sourced products while driving economic growth and community prosperity. To maintain aroma and colour of spices in most natural and hygienic form and to make it available to all parts of Nigeria at cheaper cost. Our **Vision** is to be the no.1 cooking partner for all the Nigerian families.

World class Processing Facility in Ikorodu

We have invested **US\$10 million** in this automated processing facility. It takes into careful consideration every food safety norm customers demand. The line has a capacity to produce **20 MT per day** of finished product.

The mill's grinding technology for high VO spices enables it to retain the natural aroma and color of the grounded spices.

Automated spice processing includes Cleaning, Grinding, Blending, Sieving, Steam Sterilization, Material Handling and Bulk storage.

We ground almost all spices and condiments namely Chilli, Ginger, Turmeric, Coriander, mixed spices etc.

Batch making up to packing with minimal human intervention, thus ensuring high product quality and hygiene.

Leasehold warehousing capacity upto 2000MTs

Silo

Steam Steriliser

Packaging Machine

Farm to Factory

Cultivate & source various varieties of chillis and other spices that have pungency and color characteristics that meet our customer's specific requirements.

The matured fruits are carefully plucked from the fields and moved to open sites to allow it to sun-dry to reduce its moisture levels by 85%. From here the materials are carefully packed, the bags are registered and sent to our warehouse in Kaduna state.

The dried fruits are transported to our processing mill in Ikorodu where they are passed through various rigorous stages to remove any foreign matter before being grounded/crushed, sterilized and packed as per customers requirements.

What do we do?

We support small farmers to grow chilli, turmeric and ginger profitably.

We process through steam sterilisation for maintaining its natural colour, aroma and high quality.

We crush, kibble, slice, powder and package our spices

We sell spices to both business and consumers in Nigerian markets

Overview

S

Strengths

- Wide usage of our product.
- Quality and hygienic product.
- No major competitors with continuous supply in our product category.

W

Weakness

- Inadequate transportation and power supply effects production and distribution.
- High Loan interest rates.
- Continuous sourcing of quality raw material.
- Heavy reliance on middlemen.

O

Opportunities

- Export potential to international markets exist.
- Wide possibility of brand extensions.

T

Threats

Adverse weather conditions and climate change pose risks to agricultural productivity effecting raw material quality and prices.

Problem Statements

Supply Chain Inefficiencies

- Poor storage & cold-chain facilities cause **30–40% post-harvest losses**
- Dependence on middlemen increases costs and reduces transparency

Lack of Reliable Sourcing

- High import dependence despite local production potential
- Seasonal and rainfall-driven supply fluctuations

Fragmented Small Farmers

- Predominantly smallholder farms limit economies of scale
- Limited access to finance, quality inputs, and modern farming practices
- Weak bargaining power against intermediaries

Quality Inconsistency

- Non-standardized drying, grading, and packaging
- Storage-related contamination and pest damage
- Inconsistent quality leads to export rejections

Consumer pain points

- Unhygienic processing and grinding practices
- Limited branding and quality assurance
- Low trust, convenience, and food safety standards

Impact & Sustainability

Empowering Farmers, Creating Jobs

No Dependence on Import

100% support to local farmers

Support to Farmers

- Direct sourcing of raw spices 12 farmers market and 7 aggregators.
- Training programs to 350+ farmers on post-harvest handling and quality standards.
- Fair pricing agreements to improve farmer incomes.

Employment Creation

- **300 Jobs** in processing, packaging, logistics, and sales
- Skilled and semi-skilled opportunities for youth and women.
- Indirect employment through distribution networks and retail partners

Community Impact

- Strengthening rural economies by integrating farmers into formal supply chains.
- Reducing post-harvest losses through modern grinding and packaging.
- Contribution to Nigeria's food security and export diversification.
